**RETENGO IS THE SEAMLESS WORKSPACE LETTING SOLUTION.**

**ALLOWING USERS TO RENT OUT THEIR PRIVATE WORKSPACE USING BLOCKCHAIN. DIRECTLY THROUGH THE PHONE**

**WITHOUT ANY MANUAL INVOLVEMENT.**

## VISUALIZATION OF CONCEPT

Retengo combines the familiar workspace approach in the property distribution sector with Blockchain technology. Our eco- system will soon provide access to individual sharing of workspace directly from the phone.

Retengo is a platform based on the Ethereum Block chain and powered by the retengo coin token (reg).

Retengo coin is the ERC20 token that aims to become the preferred method to pay for workspace services through the Ethereum Blockchain and to access the ecosystem of services provided by the Retengo workspace platform.

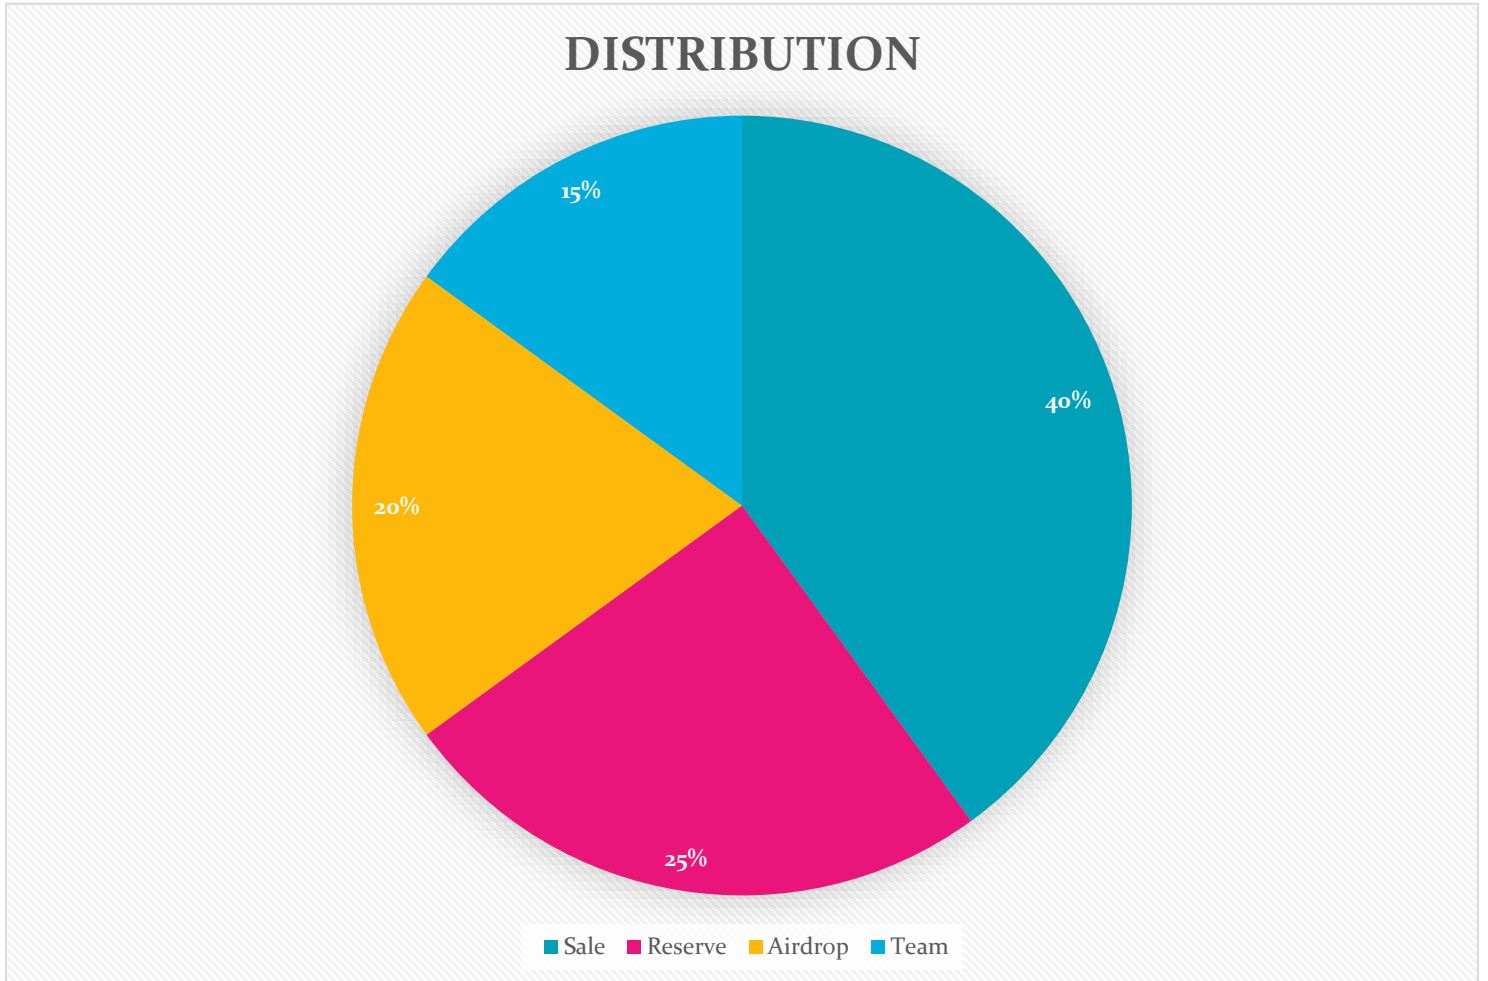

The adoption of cryptocurrencies will impact the way we access workspace services in the future and Retengo coin is poised to play a leading role in this new era of workspace and letting economy.

## ❖ DATA SHARING

### BLOCKCHAIN WORKSPACE & DATA SHARING

Today's blockchain revolution can minimize traditional workspace renting transaction fees.

By moving the renting economy to the Blockchain's decentralized network, we democratize the platform for the benefit of active contributors of ecosystem. Currently, centralized renting economy platforms have two key roles in sustaining the renting economy:

- ❖ They connect buyers and sellers through a technology platform;
- ❖ They provide a secure and trusted environment for the final user.

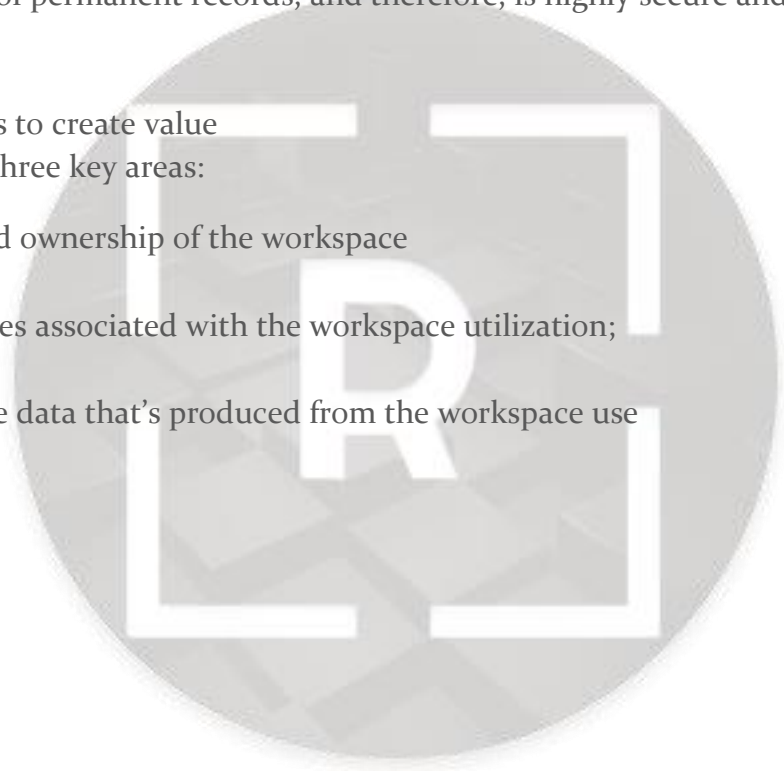

## ❖ **BENEFITS**

Blockchain technology has the potential to reduce transaction and trust costs that prevent property owners from monetizing their workspace. Bitcoin, invented by Satoshi Nakamoto in 2008, has since been adapted as a way to track the movement of all kinds of digital assets, from insurance contracts and loyalty points to electrons on electricity grids. Blockchains are decentralized ledgers spread across thousands (or more) computers, and they have no singular authority. Each transaction within a time period is recorded in a block, which refers back to a previous block, creating chains of blocks. As such, Blockchain technology allows the creation of permanent records, and therefore, is highly secure and trust promoting.

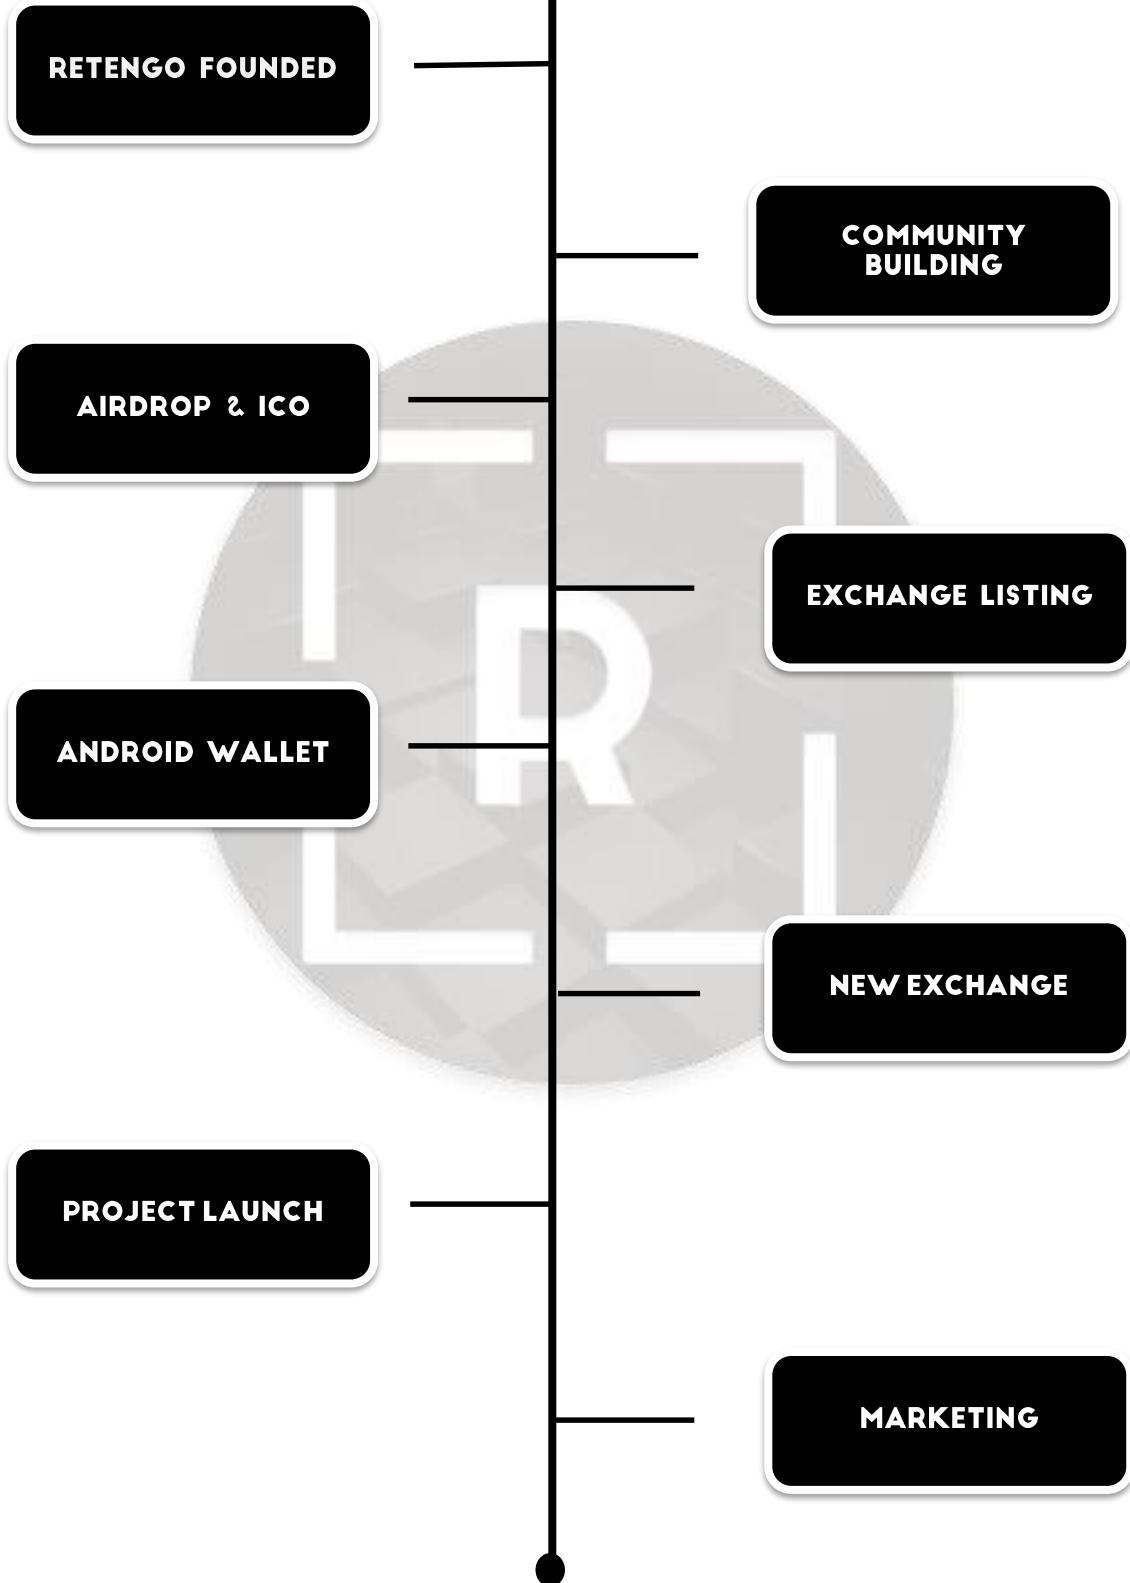

Retengo aims to create value by automating three key areas:

- Shared ownership of the workspace
- Services associated with the workspace utilization;
- All the data that's produced from the workspace use
